A L U M I N I U M I N N O V A T I O N

FEATURES & BENEFITS

- Non-Combustible (tested to both AS1530.1 and AS1530.3. In accordance with the Australian Building Codes Board, it is a requirement that both AS1530.1 and AS1530.3 be completed and certified to be classified as 100% non-combustible and suitable for the building industry and cladding projects)
- Tested to AS5637.1-2015 (required for obtaining a B1 group number for internal use on walls or ceilings)
- Recyclable
- High quality 5052 marine grade aluminium
- Light weight aluminium sheets
- High in strength and durable while still maintaining a flat, even surface
- Suitable for all Indoor projects
- Suitable for fabrication to meet specific requirements without losing performance
- Resistant to corrosion
- A wide range of textured finish styles to give your project a modern or contemporary look
- 1.6mm thickness with Fire Retardant Matte Finish
- *5-year warranty for indoor application (please refer to terms & conditions)
- *10-year warranty against structural faults (please refer to terms & conditions)
- Tools available to assist in fabrication and installation

For technical information about this product please refer to our **Specifications and Certifications** brochure under **Ai Panel**.
